## New Puppy Checklist

The doctors and staff of Crestview Animal Hospital would like to congratulate you on the new addition to your home! The first few months are very important for your new puppy. Below is a checklist of recommendations to ensure your puppy's health and to assist you in recording your puppy's schedule of visits. Please remember to bring this sheet with you to every visit.

*Note: These are general vaccine guidelines. Our veterinarians may suggest modifications based on your puppy's individual circumstances.*

**Date:** \_\_\_\_\_ **Weight:** \_\_\_\_\_ **Age:** 4 Weeks

**Recommended Services:** *Physical Exam, Fecal Exam, Deworming.*

**Date:** \_\_\_\_\_ **Weight:** \_\_\_\_\_ **Age:** 6-8 Weeks

**Recommended Services:** *Physical Exam, Fecal Exam, Deworming, DPC Vaccine.*

**Date:** \_\_\_\_\_ **Weight:** \_\_\_\_\_ **Age:** 9-11 Weeks

**Recommended Services:** *Physical Exam, DPC Vaccine.*

**Date:** \_\_\_\_\_ **Weight:** \_\_\_\_\_ **Age:** 12-14 Weeks

**Recommended Services:** *Physical Exam, Bordetella Vaccine, DPLC Vaccine, Lyme and/or Influenza Vaccine.*

**Date:** \_\_\_\_\_ **Weight:** \_\_\_\_\_ **Age:** 14-17 Weeks\*

**Recommended Services:** *Physical Exam, 1 Year Rabies Vaccine, DPLC Vaccine, Lyme and/or Influenza Vaccine, Microchip.*

**Spaying or Neutering:** 6 Months Old (your puppy can also be microchipped at this time if it has not been done already).

**Heartworm Preventative:** Start between 9-12 weeks of age and give monthly year round.

**Flea and Tick Preventative:** Start between 9-12 weeks of age and continue monthly year round.

\* If your puppy is younger than 17 weeks old at the time of the last DPLC vaccine, we recommend a parvovirus booster vaccine to be given 2-3 weeks later.
